Operating system

AccèsD supports the most recent versions of Windows and Mac OS X.

Like Microsoft, **our support for Windows XP ended** on April 8, 2014. For more information, please visit the [Microsoft](#) website.

However, the [Guaranteed 100% Secure Program](#) will continue to use Windows XP.

[Update your operating system](#)

Supported web browsers

Please install [Google Chrome](#) or another browser supported by AccèsD.

To use AccèsD, your browser must have 128-bit encryption protocol.

Microsoft Edge on Windows 10 is not supported by AccèsD. Parts of the site may not work properly or may not be available. Please use one of the supported browsers.

Note that your browser must be configured to accept cookies.

Procedure for enabling and disabling cookies

Cookies are strings of characters containing information about your activity on a website. The server sends this information to the browser when you visit or revisit the site.

There are 2 types of cookies: session cookies and persistent cookies. Session cookies are not stored on your hard drive, but are stored in the memory for the duration of your session to identify you, and deleted when you log off AccèsD. Persistent cookies are stored on your hard drive and recalled at your next visit. Cookies are text files and cannot be used to infect a computer with a virus or any other threatening data.

To use AccèsD, your browser must accept cookies. If your browser is not set up this way, click the link that corresponds to your browser to change the settings.

How to enable JavaScript

JavaScript is a widely-used Internet programming language. However, its use may be blocked by your network or browser.

If you access a site from a secure network, it may block JavaScript. In this case, contact your network administrator for more information.

Though JavaScript may be supported by the network, your browser may still reject it. Here's how to correct this:

If the version of your browser is older than 4.0 (or if you use another browser), JavaScript may be disabled. You should [update your browser](#).

If your browser is more recent, version 4.0 and higher, JavaScript may have been manually disabled. In this case, follow this procedure to enable JavaScript:

Explorer

Select **Tools**, then **Internet Options**.

Click the **Security** tab.

Click **Default Level**.

Double-click **OK** to return to your browser.

Firefox Mozilla

Select **Options** from the **Tools** menu.

Click the **Content** tab.

Check **Enable JavaScript** and **Enable Java**.

Click **Ok**.

Safari

Select **Preferences** from the **Safari** menu.

Choose the **Security** tab.

Check **Enable Java** and **Enable JavaScript** from **Web Features**.
